

CENELEC and NEM

- CENELEC supports in principle the aims and objectives of NEM where these relate to current and future standards in the area of electronic media.
- The CENELEC SmartHouse project will also output into the EU Framework Programme any perceived areas where further standardisation work is required.
- CENELEC supports the view that the outputs from SmartHouse Code of Practice should be taken forward to large scale demonstrators that show the value of the SmartHouse work and the standards that are recommended by the Code of Practice.
- CENELEC would be pleased to have involvement in standardization projects that may result from the NEM initiative.
